

Innovative Molded Applications

At Lifoam we listen to customer needs then apply creativity to develop answers. We provide innovative solutions for a variety of industrial markets: Medical, Pharmaceutical, Construction, Food Service, Household Appliance, Electronics, Furniture and many more. The company holds numerous patents, a tribute to its ingenuity.

Custom Molded Packaging

We customize every packaging solution to meet your specific requirements. Custom designs eliminate waste and save money.

Protective Packaging

Protect fragile items from shock and vibration using EPS cushions or temperature sensitive materials using ProPak insulated shippers and gel refrigerants.

Components

Molded foam components are an excellent choice for construction applications such as Insulating Concrete Forms.
